Joint Conference on Digital Libraries (JCDL) 2004

Tucson, Arizona, U.S.A.
June 7-11, 2004

JCDL 2004
Global Reach and Diverse Impact

Website: http://www.jcdl2004.org

Scope

The Joint Conference on Digital Libraries is a major international forum focusing on digital libraries and associated technical, practical, and social issues. JCDL encompasses the many meanings of the term "digital libraries," including (but not limited to) new forms of information institutions; operational information systems with all manner of digital content; new means of selecting, collecting, organizing, and distributing digital content; digital preservation and archiving; and theoretical models of information media, including document genres and electronic publishing. Participation is sought from all parts of the world and from the full range of disciplines and professions involved in digital library research and practice, including computer science, electrical engineering, information science, information systems, librarianship, archival science and practice, museum studies and practices, technology, education, medicine, intelligence analysis, social sciences, and humanities. All domains – academia, government, industry, and others – are encouraged to participate as presenters or attendees.

Paper Submission

JCDL 2004 encourages submission of papers that illustrate the digital library's **global reach and diverse impact**. Examples include (but are not limited to): major national or cross-regional digital library projects; case studies exemplifying successful international collaboration and impact; innovative cultural preservation and dissemination projects aimed at preserving unique and indigenous knowledge; the development and use of digital library technologies for national (and international) security; digital library research for intelligence and security informatics; digital library techniques, content, and services based on cyberinfrastructure; digital library research for enhancing e-learning and education; and other novel and high-impact digital library efforts.

Full and short papers will be included in the conference proceedings and will be presented at the conference. Consult the web site for specific submission instructions including a link to the paper submission template. The conference will award the Vannevar Bush Award to the best full paper. Proposals for tutorials and workshops (half-day and full-day), as well as panels, posters and demonstrations are also solicited. Consult the web site for submission details.
